Summary

BCA graduate and full-stack developer skilled in MERN stack, Python, Flask, REST APIs, authentication systems, databases, and AI-powered applications. Experienced in building responsive web applications, real-time features, RAG pipelines, NLP sentiment analysis, and machine learning solutions. Strong foundation in data structures and algorithms, object-oriented programming, DBMS, operating systems, and computer networks. Seeking software engineering internship or entry-level full-stack developer roles.

Education

Vivekananda Institute of Professional Studies

Bachelor of Computer Applications

New Delhi, India

Aug 2023 – Jun 2026

- **CGPA** : 8.55 / 10
- **Coursework** : Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP, Machine Learning, Web Technologies

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, PHP, Dart

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Redux, Context API

Backend: Node.js, Express.js, Flask, REST APIs, WebSockets, Microservices

AI / ML: TensorFlow, PyTorch, Scikit-learn, NLTK, NLP, RAG, FAISS, Prompt Engineering

Databases / Cloud: MongoDB, MySQL, Redis, Firebase, Cloud Firestore, Vercel, Netlify

Tools: Git, GitHub, Docker, Postman, Figma, Linux, CI/CD, DevTools

Projects

Notelm | React.js, Node.js, MongoDB, RAG, FAISS, Socket.io, Cheerio, Bcrypt

Source Code | May 2026

- Architected an AI study platform with a RAG pipeline using FAISS vector search, ingesting PDFs, URLs, YouTube videos, and text for unified semantic search, source-grounded answers, quizzes, flashcards, and study roadmaps.
- Engineered a real-time multiplayer quiz engine with Socket.io, live leaderboards, host controls, streak tracking, and progress dashboards for 50+ concurrent users per session.
- Automated quiz, flashcard, and roadmap generation from uploaded content, reducing manual study preparation time by 60% and improving learner workflow efficiency.

CurEase | MERN, Flask, Firebase, PyTorch, Scikit-learn, Tesseract, OAuth, JWT

Source Code | Nov 2025

- Designed a 3-portal hospital management system for patients, doctors, and admins, consolidating appointment scheduling, pharmacy workflows, queue management, prescriptions, and patient history.
- Implemented OAuth 2.0, JWT authentication, encrypted passwords, and role-based access control to secure cross-portal data and support real-time doctor and admin operations.
- Trained and deployed an ML symptom classifier on 700+ patient records and a food image recognition model on 2,000+ images using PyTorch and Tesseract OCR for disease prediction and nutrition insights.

ReviewLens | Flask, NLTK, BeautifulSoup, Selenium, Plotly, Firebase, REST APIs

Source Code | Jun 2025

- Built an NLP sentiment analysis platform using NLTK VADER and Pandas to classify 100+ product reviews per brand as positive, negative, or neutral from CSV uploads and SERP API results.
- Developed a concurrent multi-brand comparison engine with Python threading, interactive Plotly dashboards, and Firebase persistence for saved searches, comparisons, and analysis history.
- Engineered a product discovery pipeline using Google Custom Search API, Selenium reverse image search automation, barcode-based lookup, Flask-Mail OTP authentication, and REST APIs.

Experience

Sastorm Software

Salesforce Developer Intern

Gurgaon, India

Feb 2025 – Mar 2025

- Developed Apex triggers and Salesforce Flow automations to streamline CRM lead assignment workflows, reducing manual processing time by 40%.
- Optimized SOQL queries, CRM configurations, custom reports, and dashboards to improve data management, reporting accuracy, and sales pipeline visibility.

Certifications

- Python for Data Science – IBM
- AWS Cloud Practitioner Essentials – AWS
- JavaScript Essentials – Cisco
- Full Stack Web Development (MERN) – Udemy
- Complete Data Structures and Algorithms in Python – Udemy
